PORTFOLIO

CEILING SAN GIOVANNI ALLE FONTI BAPTISTERY

In this important project, Veneranda Fabbrica del Duomo has chosen to use as a ceiling metal strips of wire mesh R&R 14x1, following a wave pattern, lining the ceiling of the Baptistery San Giovanni alle Fonti, the archaeological area below the square of the Dome of Milan.

The contrast between the ruins of Ambrosian age and the modern panels in wire mesh creates a magical and timeless atmosphere.
