EXHIBIT CASA DECOR

CANGIANTE

For the presentation of metallic mesh 100% Made in Italy to the Spanish market, T.T.M. Rossi has chosen to participate to Casa Decor exhibition in Barcelona.

On this occasion the architects Serra and De La Rocha have reconstructed the ambiance of a TV room using the metal mesh Cangiante rubbed in order to recreate the sensation of a burning and captivating fire, to enjoy the watching of a movie on the television built-in the cupboard completely covered with the wire mesh Lizard.

The wall behind the sofa could not be decorated without a stainless steel mesh, symbolizing the vertical lines of a upholstery, for this reason the choice fell on the model Spiga.
