### SCENERY GIOVANNETTI JEWELLERY

# STELLA

Under the artificial sky of the glass cupola of the Park Hyatt Hotel in Milan, celebrating the magic of winter and welcoming the opening of the new boutique in Milan, Giovannetti Jewellery presented the light installation Snow Cloud that re-proposes the traditional chandelier concept uniting high handicrafts and design. The result is a precious installation in which a suggestive LED lighting makes shine the weaving of stainless steel, brass and copper of the numerous clothes of Stella mesh superimposed and mixed in different chromatic compositions.
