

SPIGA

PORTFOLIO

FURNISHING ROSSO BARRIQUE

Wall sculptures that play a leading role in any environment and suggest solutions that drive volumes and expand the areas. This is the philosophy of Arch Caramma for the interiors of the Lounge Bar Rosso Barrique in Porto Cervo.

Create a compelling and sophisticated atmosphere where the stainless steel wire cloth Spiga has given a touch of modernity and support the creativity of the architect.

Flexible and rigid at the same time, this type of cloth could be shaped around an existing structures, maintaining the desired shape and enriching any environment with its sheen.
