

PORTFOLIO

EXHIBIT MAST3.0 - SALONE DEL MOBILE

RIVER

An unusual background, created with the product River, has led life to the stand of Mat3.0, where the product presented has found in the metallic cloth the same characteristics of lightness, strength and elegance. The black background on which they were tensioned the River's panels weaved with stainless steel wire, has emphasized the same wire mesh, reflecting the lights above the stage and creating a high-tech display for the design products put presented. A stand born to enhance Made in Italy, with a focus on design and technology.
