

## PORTFOLIO

### RETAIL OREFICERIE

# R&R

In the most prestigious European and world capitals, the windows of the jewelry exhibit metallic fabrics TTM Rossi. The windows back-panels made of sturdy stainless steel mesh R&R contribute to create an environment of great technical simplicity inspired by the combination of wood and steel. The use of metallic fabrics allows the creation of semi-transparent backgrounds that allow the outside light and the eyes of passers-by to flow within the store, creating a bright and fine setting for refined products on display.
