### FURNISHING SERENA

# MINI RIVER

Riva 1920 for the 2014 edition of Salone del Mobile in Milan, has chosen to entrust the designer Figini the realization of a lamp that would combine the philosophy of the wood to the technicality of the wire cloth.

Riva 1920 decided to use the mooring posts discharged from Venice, a principle of reuse that goes well with wire mesh, 100% recycled and recyclable product. The designers managed to realize a lamp creative and elegant, with shades of gold and silver, light reflections strengthened by lampshade made with the metal mesh Mini River.
