PANELS ALBERGO DELLA SALUTE

MINI RIVER

Redesigning the interiors of the hotel Albergo della Salute in Val Taleggio - Bergamo, the architect Alberto Sala has chosen to favour natural materials with low environmental impact.

In the SPA area were applied large panels in metal mesh Mini River, in order to filter the daylight and create sheltered areas, which gave to the entire room an atmosphere of calm and relaxation.

The warm shades of natural bronze wire create a soft luminosity, that is well agreed with the large presence of wooden surfaces.
