EXHIBIT  
STAND CASPRINI 2016

# TEX 80-010

Tex Light wire mesh completely weaved in stainless steel, has been stretched on the panels which allow to divide the spaces within Casprini stand.

The use of the Metaldesign wire mesh has allowed to create panels that filter the light exalting the stand and creating a stimulating visual atmosphere with ethereal colors in an elegant environment . The fabric Tex Light has been noticed for its originality and elegance with its light rubbing that gives a three-dimensional effect of great visual impact
