M&M A304

A soft curtain of thin wire mesh M&M A304 surrenders the large Morfeus stand at Salone del Mobile 2015, and the result is an decisively effective and original.

From the outside: a soft metal curtain that reveals the exhibits to visitors who walk the corridors side.

From the inside: a neutral and modern background, that welcomes visitors with great sobriety and accompanies them discreetly, never overlapping to the exposed elements.
