

## PORTFOLIO

### PARAPETS MILANI GIARDINI

# SPIGA

Spiga is a weave that offer characteristics of rigidity, stability and robustness, but with a great flexibility.

These features have allowed the construction of a parapet that is equally useful, elegant and sophisticated.

The aesthetic effect that you can find in this kind of weave, born to the research of interesting textile texture defined, with the intent to create continuous and strong lines that characterize this product and with contemporary and attractive look and shapes that this kind of weave can increase.
