### FURNISHING ACRYLIC COUTURE

# CANGIANTE

The inclusion in methacrylate allows more flexible metal mesh to retain their unique three-dimensional effect, emphasizing the iridescent and shimmering reflexes.

The German company Acrylic Couture has developed the project of an elegant desk made of acrylic sheets with incorporated the wire mesh Cangiante copper: a valuable decorative element that frames the desk and, thanks to the LEDs applied to the top of the panels, diffuses a soft ambient lighting, creating a magical play of light and shadow.
