

The well-known chain of US Department stores Bloomingdale's, has chosen to use here the metal mesh M&M SILVER of TTM Rossi MetalDesign range to realize elegant curtains. Recreating a contemporary and relaxing mood, tried to cover the wall with an impeccable touch of design.

The magic of this wire mesh lies in the ability to reflect the lights that strike it and, at the same time, to make them their own by assuming different nuances.

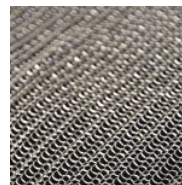

Stainless steel, a precious material appreciated for its many virtues such as strength and gloss, has lent itself magnificently to this application as it is hygienic, elegant, fireproof.

For this reason M&M SILVER has guaranteed a truly extraordinary performance in terms of both quality and functionality."
