

A major redevelopment of the ex Post Office building in Milan, adjacent to the Central Station.

The building of undisputed architecture value, monumental and dating 1930 thanks to the Studio Citterio & Partners, buy a new aspect, where the R&R wire mesh on the top floor of the same building, will give a modern reading to the façade while maintaining the rigor of a historic building.

Thanks to our metal mesh the structure has:

- low solar energy storage in the baffle
- high acoustic noise reduction system
- low solar direct and total transmittance
- 100% recyclable product
