

We wanted to make the bar world class and unique, showcasing organic curves, natural materials and precious metals. Dreamtime Australia Design prides itself in making its interiors warm and inviting with an unprecedented class and sophistication. The Heineken Bar in particular was an integration of multiple elements to create a seamless look. Curved opaque glass with copper mesh adhered to the fascia, up lit with warm led strip lighting then set behind a secondary pair of clear glass evoking curiosity, something unattainable. Topped off with a natural Tasmanian Oak bench top stained dark to create depth and contrast to the lit bar fascia. The soft, warm, ambient lighting glistening off the slightly translucent copper mesh with nothing more high end than using one of nature's precious metals like copper to create a luxurious feel. The curve glass mimicking calming organic curves in nature suggesting aesthetic beauty.
