

For the structure in stainless steel AISI 316 and the futuristic but calibrated design, Hi Tech is the ideal chair for all indoor and outdoor environments. The Arch Lissoni with the choice of Flexy to make this chair, gave new life to a product usually intended to cover the exterior facades. Its flexibility, consistency and strength have helped to create an extremely contradictory object: ultratechnological and atavistic, transgressive and iperformale. A solution studied in detail to make a refined and simple finished product yet strong and timeless.
